[Translated essay which has been published in INDIA news  
magazine]

---

The Earth has come across several changes naturally. But evolution of man within himself through science and technology without awareness - vevegam has caused infinite distractions, pollutions and damages to the Earth. Physically, mentally man is not worried to care the nature and his own being. Today the discrimination among the people is very bad. Rich - poor, educated - uneducated, religions, caste, language, communal emotions and many other factors have not changed. May be we have changed externally. We are sitting near any one in a bus but not able to accept all. Fights among the families, states, nations, castes are forever unless we become aware about the truth.

Behalf of Mahakavi's death anniversary day [September 11, 2012] we are offering this translation to this whole human community to think a while about the truth hidden within us. The individual harmony in a family must be expanded as Global harmony. This article is also supportive and authentic to Uni5 a spiritual concept which has been getting presented to the public. Om sakthi!

#### Mahakavi Bharathiyar writes,

" Several noble souls have born all across the Earth and served this human community. They all have conveyed the single message to us. They have offered the wisdom through realization of the truth. By this alone man can become a good being on the Earth! So I am writing the truth said by several great persons like treading several gems in a single string. So I am also naming the article as **"Rathna Kalanjiyam"** - Store house of gems. I request people of the state to spend some time to read this and think! Be dedicated while reading!

"The so called primordial truth - Paramathma or Bhramam or Consciousness is hidden in your knowledge! Try to observe the external world and link the same pattern within yourself. This will help you to understand the same pattern by which you can see the truth. Good actions, unconditional love, Yoga to maintain good health, wisdom through spiritual exercises can make you to realize the truth. By this alone we can get liberated from sorrows of life. This is called "Dharma". Religions, rituals, blind devotion to god in temples, blind principles are secondary. They never help you!"

#### **Voice from USA**

**Emerson says,**

"It is very difficult for me to see the truth inside people. This is because they have shut the doors of the shrines within them self and gossip about others and their religions!"

**Emerson's follower Thoro says,**

"It is very funny to see people accepting old blind concepts but not the present discoveries and thoughts. People are also against science!" [But this trend has been changed today [2012]"

#### **Voice from China**

**Sen Dasay Sung says,**

"Do not believe a religion which is there for a long time. That may not be true. That religion may not show you the truth. Truth is apart from this. People must know more about the self-truth to live. Try to understand and accept the universal laws. We need not blindly believe what our ancestors believed and performed. Do we wear the same clothing which we were wearing when we were a child?"

#### **Voice of Dakshineswar Kali temple - Kolkatha**

It does not have a physical body, frame work, shape but at the same time it is not just a non living thing like stone. It cannot be simply understood by the senses. God is the life of universe."

All religions are real and they convey the same truth. So do not discriminate among ourselves. All are worshipping only one truth. We need to accept every one like accepting the modern science and techniques which is being invented in any part of the Earth. Secularism - brotherliness and liberation has to be practiced!"
