Sendurai Uni5 Center Visit by Dr.Pradheep Kumar
5.12.2014

Dr.Pradheep Kumar and Dr.Madeswaran visited Sendurai Uni5 center on 4th December 2014.

Traditional welcome has been given by our child student baby Krupa.

Jayasree's mother met Dr.Pradheep and shared her child's developmental process through Uni5 system along with other parent also.

Professional video recording has been arranged in the center for documenting the Uni5 presentation of Land and water concepts as Anna Poorani and Deva Deepawali.

The center has produced a good looking neat work through various teaching aids for show-tell activity.

Every object has been allowed to explore by the child sensually after the presentation.

Ms.Shanthi presented the concepts.

The voice level was good with enough modulations and expression with right local language.

We were happy to see baby Jayasree who got the presentation through the tutor.

She was observing and she was given several opportunities for language skills.

Immediate comprehension activity was given.

The presentation also linked every object with the child with age required facts.

Later Dr.Pradheep gave a talk about traditional Barathiyan mathematics patterns based system of learning which can extend to all subjects.

We have also initiated the center with energy concept. They have to make a syllabus around that by March 2015.

Discussion about German students' visit was also discussed.
