" My spiritual awareness has evolved more after this session. When I started this company I wished to train my staff members in a different way. I have also conducted many sessions. They all are being conducted only on one primary core area of focus. That is passion. This passion with dedicated work gives bliss in life. For that I now do not need a professionalism. I need an unbiased session. Uni5 project is an unbiased spiritual session which has made its impact upon my workers. Sakthi foundation has supported my view through this session.

My workers has changed emotionally and got into more spiritual thoughts. We need to

take this project to more public and my other areas of work. I need to take this spirit to many more centers. Calendar has been appreciated by all consumers. Spiritual level concepts have been clearly understood. Doctors when take these concepts through our February Uni5 session it will reach the common man soon since they are in the respectable position."
