Namma Vedu Uni5 Infancy Center – Sendurai

Meeting conducted by Dr.M.Madeswaran on 17.10.2014

“I am very happy, relaxed and satisfied in my life” - Ms.Shanthi – senior staff

We wish everyone a very good Deepawali festival. Foundation share the moments with good sweets and we had a good feast of photo session with many photos which reflects the need for early child hood education and essence of Uni5 learning.The center now has 33 children and we wish to limit with 35.

Sadhana is 2.5 years old. She lives in a village which is around 5 Kms away from our center. Her grandmother is having a shop in Sendurai and she is well aware about our center. So she has decided and put this girl in our center. Every day she brings her granddaughter from that village and takes her back. She is much aware about our center’s system of early education. This is the real success of the Uni5 system in a rural setup.

Murali [1.5 years – name changed] has a twist in his legs by birth. We were little bit worried about taking him but his mother was very particular and confident in placing him here. She said that the teachers in Namma Vedu care the children very well. This is the awareness of the rural mothers.

Harmony brought by the center - The center has given chance to solve the enmity of 2 families. Children belonging to 2 families who are enemies are now in harmony after coming to this center. This has brought few changes among the parents.

Attitude of a mother...A mother who did not have much interest in sending the child here saw the

way we make the children to sleep in a very neat and safety way. She changed her idea about us and started involving in many activities.

Interest of parents - This year our parents have involved much in all festivals. Many brought their new born infants and participated in the festivals. Most of them prefer to come and observe the rituals.

Attitude about the center...Sendurai public has recognized our center as a high class learning center especially after installing CC camera and more education tools. At the 7th year we got the name – *“whether the center will take my child?”*

More infants – Children below 3 years are coming more. This reflects our mile stone in infancy education and we need to learn more and equip our self.

Regularity in fees payment - Fees is being paid regularly. For this we have to work for 8 solid years.

More challenge in observation - As the number of children who can talk well is very few, we are able to grasp the gestures and actions of infants and make our observations. This is very easy and correct. We are very keen in decoding the communication and documenting.

Laptop's helps us --- the new laptop saves our time and helps us to document and safe all our work.

Uni5 articles given to parents every month about child care is really helping few parents.

Uni5 manual released the stress and we are just implementing what has been said in that.

Teachers worked for the development of the center: Ms.Kalavani David, Ms.Bodhini, Ms.Mallika, Ms.Priya Kannan, Ms. Sasikala, Ms.Menaka.

Helpers: Ms.Marriamma, Ms.Vasanthi, Ms.Usha

Teachers in charge currently are ...Ms.Shanthi and Miss.Hema. **Helpers:** Ms.Jothy, Ms.Magesh and Ms.Amudha

WE WISH THAT WE WILL PAY MORE TO THEM.

With Deepawali wishes,

Dr.M.Madeswaran
